Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Linda Saltiel, Registration No. 51122, on November 7, 2007.

The application has been amended as follows:

In The Claim

Claim 1 line 23 delete "premised" and substitute therewith --premixed--.

3. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to teach/show compression-attributable-cylinder-interior-gas-state-quantity-change- amount estimation means for estimating the amount of a change in the state quantity of the cylinder interior gas attributable to compression of the cylinder interior gas; and cool-flame-heat-generation-quantity estimation means for estimating a cool-flame-heat-generation-quantity-corresponding value, which is a value corresponding to a heat generation quantity of a cool flame generated prior to autoignition of the premixed gas mixture, wherein -the premixed-gas-mixture-autoignition-start-time estimation means estimates the time at which the premixed gas mixture starts autoignition, on the basis of at least the acquired cylinder interior gas state quantity at the time of start of compression, the estimated compression-attributable interior gas state quantity change amount, and the estimated cool-flame-heat-generation-quantity-corresponding value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
